Committed to promoting sustainable development, we offer a range of eco-responsible products designed to meet current construction and development needs while preserving the ability of future generations to meet their own.

We hold quality management system certifications, underscoring our commitment to quality assurance.

Exopalm utilizes highly durable industrial materials suitable for all climates, guaranteeing a lifespan of 50 years or more.

Our products are engineered to provide a sustainable solution to the pervasive problem of natural resource depletion in the construction of exotic roofing, thereby mitigating the negative environmental impacts of real estate development.

Across all our manufacturing facilities, waste is diverted from final disposal and reused in other plastic manufacturing processes in order to reduce environmental impact.

Exopalm Synthetic Material Palm Performances :

Material : HDP plastic

Lifespan : 50 years

Tensile strength : 120N/MM2

Fire resistant

Temperature resistance of 194F

and low temperatures of -104F

Color : customized

Anti-ultraviolet treatment

Thermal Conductivity :

0.02 - 0.046W/mk

Shaping : Adopt low pressure polymerization, the polymerization pressure is below 2MPa

Installation : Can be bent and cut at will, not limited by the substrate

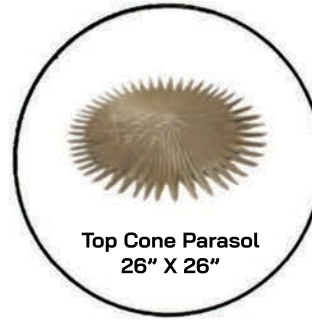

Synthetic Palm
39" X 26"

Synthetic Ridge
39" X 19"

Synthetic hip
33" X 26"

Top Cone Parasol
26" X 26"

Hurricane hooks
Prevent palm from
lifting in high winds

Rails with removable hooks
120" X 1' X 1'
The rails replaces the
horizontal wooden studs

- 1: Hook that attaches to the horizontal wooden studs.
- 2: Removable hook that clips onto the rails.
