Exopalm understands the allure of bamboo, its natural beauty, strength, and versatility. With our synthetic bamboo, we have taken these qualities and enhanced them with advanced materials and technology. The result is a stunning range of products that mimic the look and feel of real bamboo but with added durability and longevity.

Committed to promoting sustainable development, we offer a range of eco-responsible products designed to meet current construction and development needs while preserving the ability of future generations to meet their own.

We hold quality management system certifications, underscoring our commitment to quality assurance.

Exopalm utilizes highly durable industrial materials suitable for all climates, guaranteeing a lifespan of 50 years or more.

Our products are engineered to provide a sustainable solution to the pervasive problem of natural resource depletion in the construction of exotic roofing, thereby mitigating the negative environmental impacts of real estate development.

ExPalm

Across all our manufacturing facilities, waste is diverted from final disposal and reused in other plastic manufacturing processes in order to reduce environmental impact.

Exopalm Synthetic Material Bamboo Performances :

Material : HDP plastic

Lifespan : 50 years

Tensile strength : 120N/MM2

Fire resistant

Temperature resistance of 194F
and low temperatures of -104F

Color : customized

Anti-ultraviolet treatment

Thermal Conductivity :

0.02 - 0.046W/mk

Shaping : Adopt low pressure
polymerization, the polymerization
pressure is below 2MPa

Installation : Can be cut at will,
not limited by the substrate

ExPalm

Bamboo Poles :

Size diameter :

1.7 / 2.0 / 2.4 / 3.6 / 4.8 / 7.8 / 11 cm and more,...

0.67" / 0.79" / 0.94" / 1.42" / 1.89" / 3.07" / 4.33"

Poles bamboo connected to each others with
stainless steel cables

Bamboo Panels :

Size Diameter and Length : Customize Material
